

SCHJ

Schwab 1-5 Year Corporate Bond ETF

Fund Description

SCHJ tracks a market-weighted index of USD-denominated investment-grade corporate bonds with short-term maturities of 1-5 years.

FactSet Analyst Report

SCHJ is designed to provide exposure to short-term U.S. investment-grade corporate bonds. The fund tracks the Bloomberg US 1-5 Year Corporate Bond Index. The fund also invests on non-U.S. corporate bonds in the industrial, utility and financial sector. The index excludes certain types of securities, including contingent capital securities, inflation-linked bonds, floating-rate bonds, taxable and tax-exempt municipal securities, structured notes and pass-through certificates. The index is market capitalization weighted. The securities in the index are updated on the last business day of each month.
