

# SCMC

## Sterling Capital Multi-Strategy Income ETF

### Fund Description

SCMC is an actively managed ETF that provides broad exposure to various income-producing securities from around the world.

### FactSet Analyst Report

SCMC seeks competitive total return and current income by investing in bonds and other debt obligations. The funds broad investment approach may include government and corporate debt, fixed and floating rate bonds, mortgage- and asset-backed securities, loans, munis, insurance-linked securities, Yankee bonds, hybrid securities, and notes. The actively managed fund may invest in bonds of any credit quality from both US and non-US issuers, denominated in any currency from developed and emerging markets. It may also invest in ETFs and other investment companies, including affiliated funds. The fund can invest in debt securities of any maturity without limit. In addition, the fund may invest in derivatives (futures, forwards, swaps, and options) which may be used for hedging non-USD assets or to express currency views.
