

# SPAM

## Themes Cybersecurity ETF

### Fund Description

SPAM seeks to track a concentrated index of stocks from developed markets that derive their revenues from digital security software. Stocks are weighted based on market capitalization.

### FactSet Analyst Report

SPAM is passively managed, providing targeted exposure to the largest companies, by market capitalization, in digital security software. In order to be considered for inclusion, a company must generate at least 50% of its revenue from the industry, define by RIBCS. All eligible securities are ranked and weighted by their market capitalization, selecting the top 35 names for inclusion in the index. The index is reconstituted and rebalanced on a quarterly bases in February, May, August, and November. Additionally, the fund may lend securities representing up to one-third of its total assets.
