WEBL provides 3x leveraged daily exposure to a market-cap-weighted index of the largest and most liquid U.S. Internet companies.

### FactSet Analyst Report

WEBL is passively managed to provide 3x leveraged daily exposure to the Dow Jones Internet Composite Index. The index is composed of the 40 largest and most actively traded U.S. internet technology and commerce companies. Companies selected are determined by the Index Provider to derive a majority of their sales from activities such as online retail, social media, advertising, travel platforms, cloud computing or digital marketing. Because of daily rebalancing and the compounding over time, the return of the Fund for periods longer than a day, will very likely differ from 300% of the return of the Index over the same period.
