

YUMY

VanEck Future of Food ETF

Fund Description

YUMY is an actively managed fund of global companies involved in sustainable agriculture and food innovations.

FactSet Analyst Report

The security is being delisted. The last day of trading on an exchange is April 02, 2024. YUMY is one of the few ETFs that offer concentrated exposure to global Agri-Food technology and innovation. The actively managed fund encompasses three categories: food technology, precision agriculture, and agricultural sustainability. Food technology involves alternative proteins, animal feed and nutrition, and sustainable aquaculture. Precision agriculture pertains to farming optimization, including robotics and automation, vertical/indoor farming, water and irrigation, as well as related data software. Agricultural sustainability covers seed genetics, sustainable fertilizer and crop chemicals, and alternative food preservation and packaging. The fund may invest without limitation or may have little or no exposure to any of these three categories. Constituents are selected based on the advisers internal research and proprietary fundamental analysis. Additionally, ESG factors are also considered as part of the investment process.
